

Moving Car Template

Instructions

1. Fold a piece of printer paper in half hamburger-style and cut in half
2. Draw a road for your car to drive on and a scene that you want your car to drive past (use picture example for guidance)
3. Cut a slit about 3 inches long along the middle of your road
4. Color in car template and cut it out
5. Glue or tape car to top of craft stick
6. Put the craft stick through the slit in your half sheet of paper – move the craft stick side to side so it looks like your car is driving!
